Abstract:

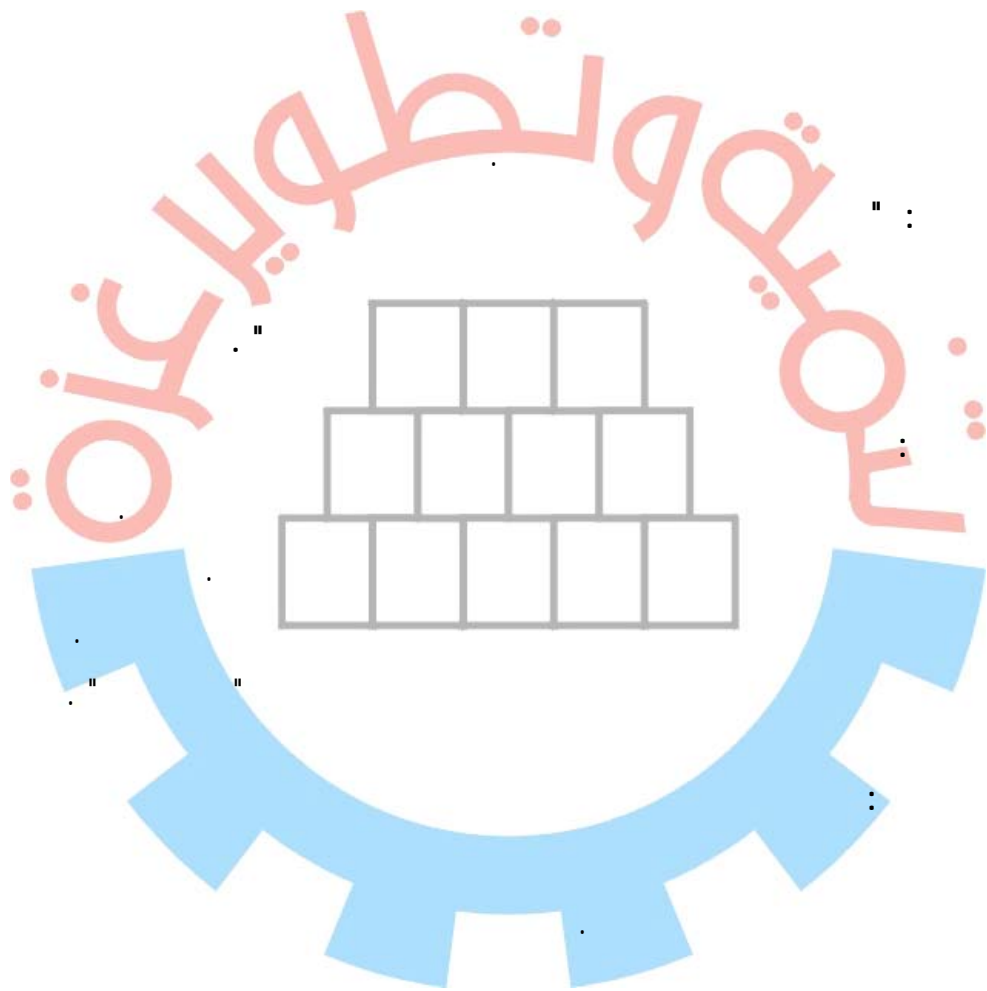

The process of finding out the natural gaz in a commercial amount, near Gaza strips beaches gave the Palestinian economic new aspects (potentials) for the gaz to be a cheap source of energy and a financial income by its expected exporting.

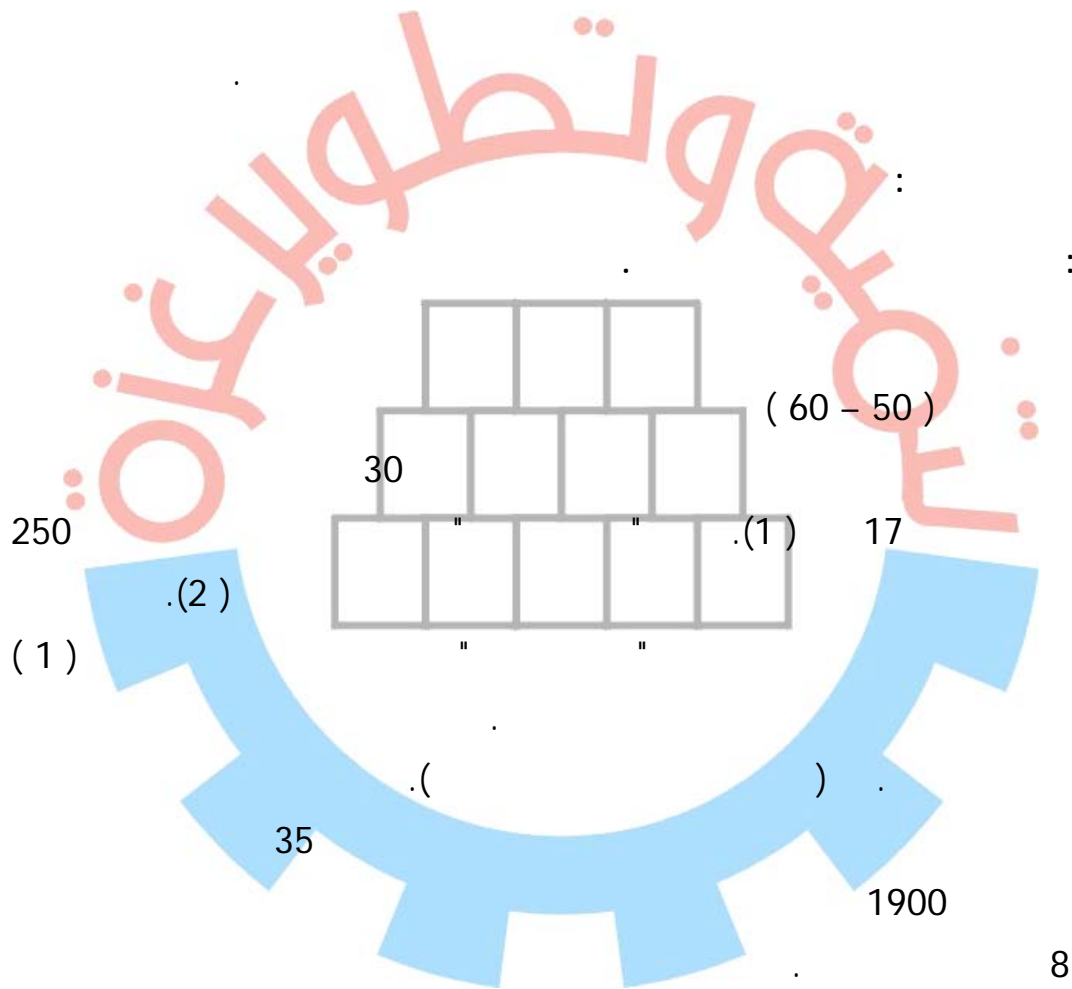

How ever the big challenge for the Palestinians in best use for the Palestinians in the best use for the gaz , it's in the politics issues or Israelis inter courses, whither in Palestinians them selves in general or in the Palestinians economy . It's in the Palestinians ability to know, realize ,and fight for his right in his fortune and his right in choosing the people to rum this fortunes in a decent and effective way.

In this humble work we will do our best focusing in the natural gaz issue in Palestine.

By mentioning some importing point believing that its our duty toward all.
